

SECRET

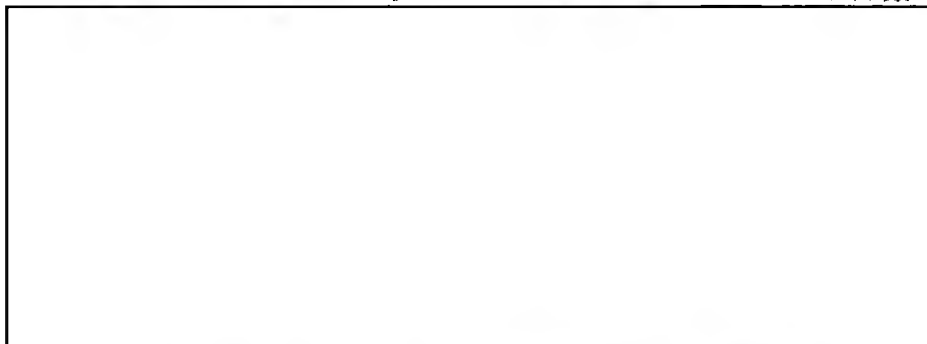

16 June 1966

NOTE FOR: Executive Officer/DDS&T

SUBJECT : Current Tasking on Me - FYI

Just to keep you informed - here are some of the matters that I have been tasked by Dr. Wheelon and Mr. Duckett:

25X1C

(2) Carl Duckett is putting together a Strategic Weapons Panel to discuss the ABM problem on 23-24 June, and I am calling around the country to invite the Panel members. After that, I will work further on arrangements for the Panel meeting.

(3) I have been working with Dr. Wheelon, [redacted] [redacted] Bob Chapman and George Miller on the visit of Admirals Gayler, Bowen and Michaelis on Friday, 17 June. The briefing schedule is all set and the Admirals have received additional clearances such as O and [redacted] through [redacted]. Arrangements have also been made to facilitate the visitors entrance into the Agency building and further circulation to the other Offices throughout the day.

symposium there in July. Dr. Wheelon agreed that since DD/P had the conference covered already that we would not cross wires and send requirements through [redacted] We did thank him and encouraged him to bring matters of this nature to our attention in the future. OSI prepared very detailed requirements for DD/P which are being circulated to four DD/P sources who will be in attendance at the symposium.

25X1A

[redacted] had high praise for the depth of information and the thoroughness in which it was prepared by OSI. I relayed these remarks to Dr. Wheelon and to Don Chamberlain who appreciated getting the playback. This was a rush

job as [redacted] had to cable back a reply. Since you were not available at the time, I moved ahead on the problem and this is the first opportunity to inform you.
